TAVOR extending table

Assembly and use

200×100 cm · height 75 cm · extended: 280 cm · leaf 80 cm · weight approx. 80 kg. The 160 cm and 180 cm sizes assemble the same way.

Closed

Extended, with the leaf

Before you start

- Assemble with two people. The table is heavy: approx. 80 kg.
- You only need the wrench from the kit. No drill or other tools.
- Clear a floor area larger than the table, and read all the steps before you begin.

What is in the box

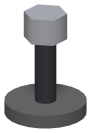

×4
Legs (bolt already fitted in each leg)

×4
Wing nuts with washers

×1
Wrench, 13 mm

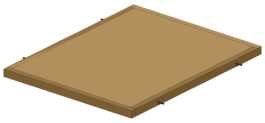

×4
Spare levelling feet

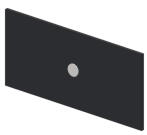

×1
Assembly instructions

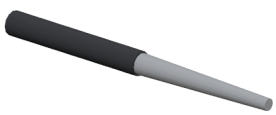

Already fitted to the table

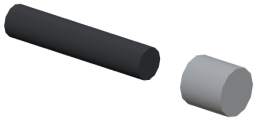

Leaf — on the shelves under the top

Steel corner plates — in all four corners of the frame

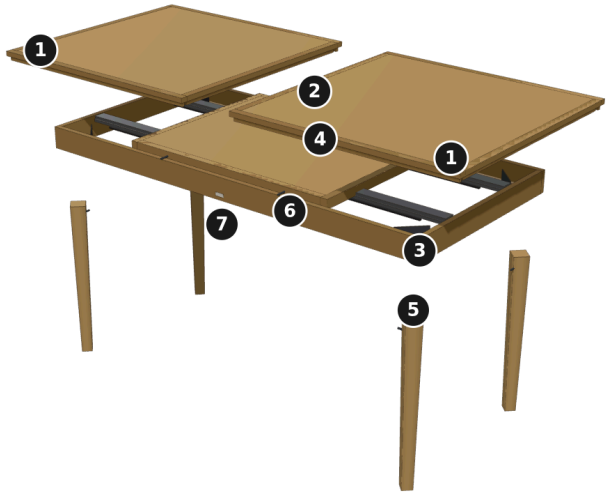

M8 bolt — inside each leg

Pins — on the edges of the leaf

Parts of the table

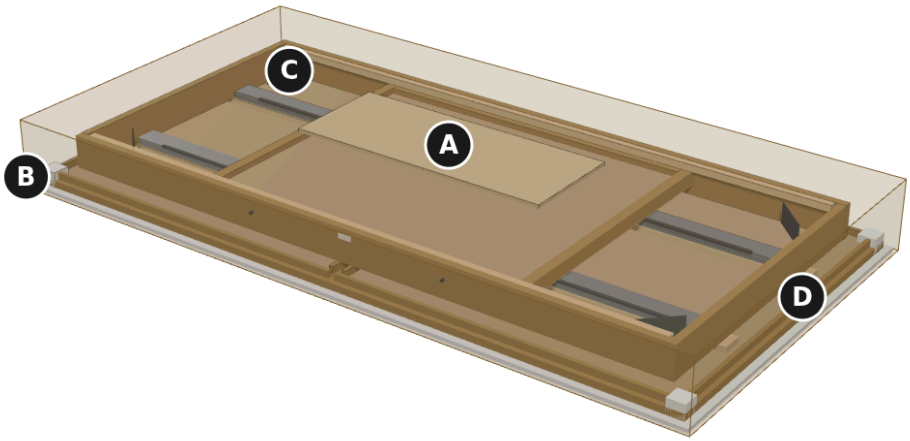

1. Two halves of the top
2. Leaf
3. Frame
4. Runners
5. Legs
6. Latch
7. Leaf shelves

1 Unpack

Open the box from the top.

Take out the inner box with the legs (A) and the hardware bag. Check that every part from the list on page 1 is there.

Do not take the top out yet. It lies face down on a foam sheet, with the frame on top.

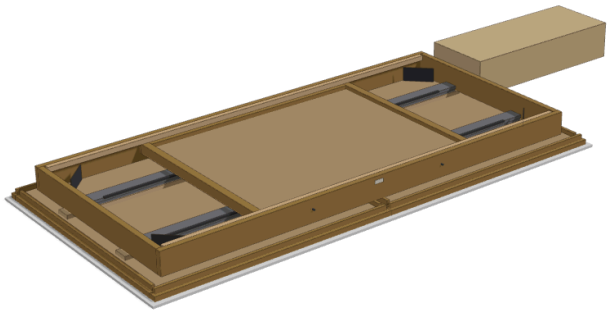

A leg box · B corner protectors · C leaf on its shelves · D straps

2 Lift out the top

With two people, lift out the top together with the frame. The leaf is already inside the frame, on its shelves, taped in place.

Lay the top face down on the cardboard or foam from the box.

Remove the corner protectors and the plastic film.

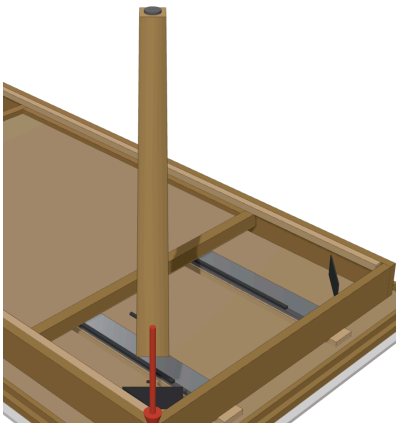

! Never stand the top on its edge.

3 Attach the legs

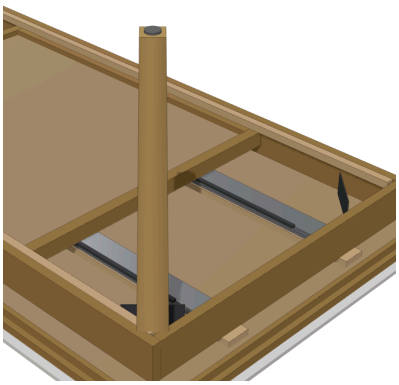

Each corner of the frame has a steel plate with a hole.

1. Put the leg bolt into the hole.
2. Turn the leg by hand until it stops, with its sides parallel to the frame.
3. Fit a washer and a wing nut, and tighten by hand.
4. Tighten a further quarter turn with the wrench.

Repeat for all four corners. The legs must not wobble.

Put the bolt into the hole

Leg attached and tightened

4 Stand the table up

With two people, turn the table over onto its legs.

Turn the levelling feet (mark ! in the picture) until the table stops rocking.

! Lift by the frame only, never by the top.

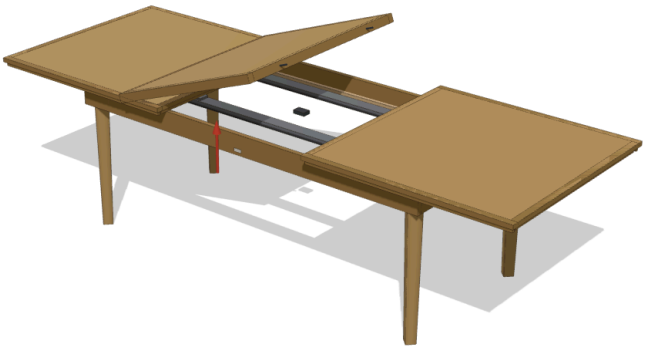

5 Extend and close

To extend:

1. Press the latch under the edge of the top, in the middle.
2. Pull one half towards you. The other half moves out by itself.
3. First time only: remove the tape from the leaf.
4. Lift the leaf off its shelves and lay it in the gap, on the pins.
5. Push the two halves together until you hear a click.

To close: the same steps in reverse. The leaf goes back onto its shelves under the top.

Lift the leaf off its shelves

Table extended: 280 cm

6 First two weeks and care

For the first two weeks the lacquer is still hardening: do not put hot dishes down without a mat, and do not scrub with anything abrasive.

Cleaning: a damp cloth only. No alcohol, no abrasives.

To move the table, lift it by the frame. Do not drag it or pull it by the top.

If something is wrong

Problem	What to do
A leg wobbles	Tighten the wing nut: by hand, then a quarter turn with the wrench.
The table rocks	Adjust the levelling feet.
The halves do not close fully	Check that the leaf sits on the pins.
Damaged in delivery	Do not assemble. Take photos of the damage and send them to the seller.
